SP521: TIBCO Spotfire 7.6 for Analysts

COURSE OVERVIEW
This course explores fundamentals of descriptive analytics and explains how to build useful, interactive visualizations using the TIBCO Spotfire. It examines the key components of good analytics solutions and provides general guidelines for when to use specific visualization types. After covering the data access, import and storage options, it explains how to build simple visualizations using well known chart types such as bar charts, line charts, pie charts and scatter plots. Attendees configure advanced visualization properties and design complex interactive features. Learn how to add data to an existing data table or add new data tables to a existing Spotfire analysis. Differentiate between in-memory data and in-database data. Explore aggregation options and tools for capturing specific aspects of an analysis.

LEARNING OBJECTIVES
- Recognize key analytics components: data, visualizations and interactions
- Discuss functions of Spotfire Server
- Explain data import options and formats
- Examine the Visual Analytics Environment and build interactive visualizations
- Use expressions and calculated functions
- Configure custom hierarchies and hierarchy filters
- Build visualizations from multiple data tables
- Work with in-memory data tables
- Work with treemaps, box plots and map charts

COURSE TOPICS
- Introduction to TIBCO Spotfire
- Data access, modification and storage
- Visualization basics
- Designing Visualizations
- Filtering and marking data
- Customization options
- Manipulate, merge and add data
- Hierarchies
- Working with categories
- Aggregations and expressions

COURSE PREREQUISITES
- None
